**COMPANY PROFILE:**

Sage X3 is not your typical ERP solution. It's a faster, simpler and more flexible business management solution for the connected enterprise.

Sage X3 accelerates business processes - from purchasing to manufacturing, inventory, sales, customer service, and financial management - within one cohesive business management system - in the cloud or on-premise. With 8-2000 user capacity, alongside flexible and ready-to-use industry best practices for distribution, manufacturing and services; Sage X3 supports growth for a profitable domestic or global business.

For a quick to implement and simple business management solution that adapts to meet your business requirements, user roles and preferences, find out more from our Gold Business Partner – Mysoft.
